### What about any sensitive or confidential information that may be on my computer?

Reformatting the hard drive can be a tedious operation, especially if it's the only drive in the system and Windows doesn't allow you to format its own system disk. E waste Disposal will make it easy to wipe a system clean.

E Waste Disposal will:

- Properly format or destroy Hard Drives.
- Will guarantee with a letter of destruction that all data will be destroyed from collected units.
- Dispose of the equipment in accordance with all Federal and State Environmental laws.
- Remove any personal information attached to the computer.

From drive to metal: complete destruction, along with a letter of destruction and of course, peace of mind!
